Inspiring testimonials

Célia - Belgian student

' Joining OpenHub in my final year was a major decision. I developed an AI solution, reducing a two-week task to 15 minutes job. The result has been a tenfold increase in efficiency for our partner, who is already reaping tangible benefits. '

FrigoLoco - Company

' Working with OpenHub has been a rewarding adventure. This pilot project has enabled us to clearly abd define the contours of a fairly ambitious AI project. The rigour and talent of the students have laid a solid foundation for promising future advances. '

Anson - Taiwanese student

' For my first immersion in the professional world, I chose OpenHub. I combined my skills in electronics and IT to capture data on a car. These analyses provided the company with valuable information. '

Why choose **Student**Labs for your projects?

- **Expert guidance and proven methodology:** Your projects benefit from the expertise of OpenHub engineers and a structured approach to guarantee concrete results.

- **Energy and creativity for innovation:** Final-year students turn your ideas into impactful solutions.

- **Rapid, collaborative progress:** Follow the progress of your projects live and get reliable results in a matter of weeks.
